

SMD/BLOCK Type EMI Suppression Filters EMIFIL®

Introduction

Murata Manufacturing Co., Ltd. has been developing the EMI suppression device market since the invention of 3 terminal capacitor DS310 series in 1979. Also, we have been striving to develop and popularize new noise countermeasure technologies as well as new products in the concept of "Develop unique products," to become our customer's best solution partner. We hope you can find the key solution to your noise problem.

Explanation of symbols in this catalog

	Features of each series	Features of each item
All Products	 F_{low} Flow soldering available  R_{eflow} Reflow soldering available  Hi Power Meets large current lines	  New New product   Kit Exist in design kit   ≥1A Rated current 1A or more   ≥3A Rated current 3A or more   ≥10A Rated current 10A or more
Chip Ferrite Bead	 G_{Hz} Meets high frequency noise up to 1-2GHz  H_{i-GHz} Meets ultra high frequency noise up to 10GHz	
LC Combined Type Filter		  D_{TV} Low cut-off frequency type for UHF band noise, which affects digital TV tuner
Chip Common Mode Choke Coil		  H_D For high speed differential signal lines (USB2.0/LVDS/IEEE1394 etc.)   U_D For ultra high speed differential signal lines (HDMI/DVI/Display Port/USB3.0 etc.)   Imp Match Line impedance has been matched to transmission lines

EU RoHS Compliant

- All the products in this catalog comply with EU RoHS.
- EU RoHS is "the European Directive 2011/65/EU on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment."
- For more details, please refer to our website 'Murata's Approach for EU RoHS' (<http://www.murata.com/info/rohs.html>).

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Selection Guide for Noise Suppression Filters

●Features & Suitable Circuits

Type	Features	Suitable Circuits
Ferrite Bead BLM/BLA Series 	<ul style="list-style-type: none"> · Miniaturized · GND connection unnecessary · Effective at low impedance line 	<ul style="list-style-type: none"> · Application set with less noise radiation · Low impedance line
Capacitor Type NFM/NFA/NFE/NFR/ NFL/NFW Series 	<ul style="list-style-type: none"> · Great noise suppression effect · With effect as By-Pass capacitor (Lineup for Power) · Good noise separation from signal (LC filter for Signal) · Effective at high impedance line 	<ul style="list-style-type: none"> · Application set with higher noise radiation · High impedance line · Circuit with By-Pass capacitor · Circuit driven by high frequency
Common Mode Choke Coil 	<ul style="list-style-type: none"> · Possible to suppress noise with less affect of ultra high speed signal · Great effect for common mode noise · Less magnetic saturation by current 	<ul style="list-style-type: none"> · High speed differential signal line · I/F cable driver · Power line

●Example

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

●Advantages to Using Common Mode Choke Coils

1. Great Effect for Common Mode Noise

Differential mode inductors work as a half impedance for common mode noise.

Common Mode Choke Coils are effective for common mode noise.

2. Possible to Suppress Noise with Less Affect of Ultra High Speed Signal

Common Mode Choke Coils can suppress Noise with less affect of Signal, even if the frequency range of Signal and Noise are the same, because they separate each conductive mode of current.

3. Less Magnetic Saturation by Current

Common Mode Choke Coils are effective for noise suppression of DC power lines, due to their less magnetic saturation at high power current, that comes from their construction of cancelling magnetic flux of differential mode current at each coil.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Digital Still Camera

Application Sample

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Smartphone Application Sample

Note • Please read rating and **CAUTION** (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
 • This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Blu-ray/DVD

Application Sample

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

LCD-TV

Application Sample

Note • Please read rating and **CAUTION** (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
 • This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

BL

Chip Ferrite Bead

Series Introduction	14
Part Numbering	16
Series Line Up	18
Product Detail	24
⚠Caution/Notice	99
Soldering and Mounting	100
Packaging	104
Design Kits	105

Note • Please read rating and **CAUTION** (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

muRata

Chip Ferrite Bead

Chip EMIFIL®

Chip Common Mode Choke Coil

Block Type EMIFIL®

Microwave Absorber

● Example of Chip Ferrite Bead BLM Series Structure

●Line Up Classification of Chip Ferrite Bead

Note • Please read rating and **CAUTION** (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

●Difference between BLM A type and B type (HG type vs HD/HB/HE type)

A type: Impedance curve rises from low frequency range. Suppresses noise in a wide frequency range.
 B type: Impedance curve rises sharply. Less damage to signal waveforms.

■Comparison of Impedance Curve

■Comparison of Resistance Element

■Comparison of Test Effect (25MHz)

BLM_B Series has less damage to high speed signal waveform.

Waveform

BLM18AG601SN1

BLM18BD601SN1

Small Distortion

Spectrum

Spectrum has been reduced from low frequency range.

Noise frequency has been reduced without reducing signals of low frequency.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

BL Chip Ferrite Bead Part Numbering

(Part Number)

BL M 18 AG 102 S N 1 D
 1 2 3 4 5 6 7 8 9

① Product ID

Product ID	
BL	Chip Ferrite Beads

② Type

Code	Type
A	Array Type
E	DC Bias Characteristics Improved Type
M	Ferrite Bead Single Type

③ Dimensions (L×W)

Code	Dimensions (L×W)	EIA
02	0.4×0.2mm	01005
03	0.6×0.3mm	0201
15	1.0×0.5mm	0402
18	1.6×0.8mm	0603
2A	2.0×1.0mm	0804
21	2.0×1.25mm	0805
31	3.2×1.6mm	1206
32	3.2×2.5mm	1210
41	4.5×1.6mm	1806

④ Characteristics/Applications

Code *1	Characteristics/Applications	Series
AG		BLM03/15/18/21, BLA2A/31
AX	For General Use	BLM02/03/15
TG		BLM18
BA		BLM15/18
BB		BLM03/15/18/21, BLA2A
BC	For High-speed Signal Lines	BLM03/15
BD		BLM03/15/18/21, BLA2A/31
BX		BLM02/15
PD		BLM15
PG		BLM03/15/18/21/31/41
PN	For Power Lines	BLE32
PX		BLM03/15
KG		BLM18
SG	For Power Lines (Low DC Resistance Type)	
RK	For Digital Interface	BLM18/21
HG	For GHz Band General Use	BLM03/15/18
EB	For GHz Band High-speed Signal Lines (Low Direct Current Type)	BLM03
EG	For GHz Band General Use (Low DC Resistance Type)	BLM15/18
HB		BLM03/15/18
HD	For GHz Band High-speed Signal Lines	BLM03/15/18
HE		BLM18
HK	For GHz Band Digital Interface	BLM18
GA	For High-GHz Band High-speed Signal Lines	BLM15
GG	For High-GHz Band General Use	BLM15/18

*1 Frequency characteristics vary with each code.

⑤ Impedance

Expressed by three figures. The unit is in ohm (Ω) at 100MHz. The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures.

⑥ Electrode

Expressed by a letter.

Ex.)	Code	Electrode
	S/T	Sn Plating
	A	Au Plating

⑦ Category

Code	Category
N	Standard Type

⑧ Number of Circuits

Code	Number of Circuits
1	1 Circuit
4	4 Circuits

BLM02AX

Series 01005/0402 (inch/mm)

High Spec Ferrite Bead ultra low DC resistance. For general signal lines.

Dimensions

Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

Packaging

Code	Packaging	Minimum Quantity
D	180mm Reel Paper Tape	20000
B	Bulk(Bag)	1000

Refer to pages from p.100 to p.103 for mounting information.

Rated Value (□: packaging code)

Part Number	Impedance (at 100MHz/20°C)	Rated Current	DC Resistance	Operating Temperature Range	
BLM02AX100SN1□	10ohm ±5 ohm	750mA	0.07ohm max.	-55°C to +125°C	Kit
BLM02AX700SN1□	70ohm ±25%	300mA	0.4ohm max.	-55°C to +125°C	Kit
BLM02AX121SN1□	120ohm ±25%	250mA	0.5ohm max.	-55°C to +125°C	Kit

Number of Circuits: 1

Impedance-Frequency Characteristics

Impedance-Frequency Characteristics

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

Feature Advantage

BLM□□AX Series

Excellent for Both Signal and Power Lines. Multi Function Chip Ferrite Bead BLM□□AX Series

Feature

- 1/2 the DC resistance than conventional type utilizing the latest technology
 - New ferrite material
 - Optimum ferrite firing condition
 - Fine piling technology
 - Advanced coil pattern design technology
- Improved stability of performance at heat shock
- Wide line-up from 10 to 1000ohm(@100MHz) useful for signal line

Advantage

- High Rated Current
 - Good for miniaturization of high power equipment
- Lower Voltage down at Ferrite bead
 - Good for Battery driven equipment by saving running voltage margin
- Higher Reliability

Drastically Reduced DC Resistance

Test Result - Heat Shock

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

BLM02BX Series 01005/0402 (inch/mm)

High Spec Ferrite Bead ultra low DC resistance. For high speed signal lines.

Dimensions

Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

Packaging

Code	Packaging	Minimum Quantity
D	180mm Reel Paper Tape	20000
B	Bulk(Bag)	1000

Refer to pages from p.100 to p.103 for mounting information.

Rated Value (□: packaging code)

Part Number	Impedance (at 100MHz/20°C)	Rated Current	DC Resistance	Operating Temperature Range	
BLM02BX151SN1□	150ohm ±25%	200mA	0.7ohm max.	-55°C to +125°C	New

Number of Circuits: 1

Impedance-Frequency Characteristics

Impedance-Frequency Characteristics

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

BLM03PG

Series 0201/0603 (inch/mm)

0201 size for power lines.

*Please refer to the products designed for both power lines and signal lines.

Dimensions

Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

Packaging

Code	Packaging	Minimum Quantity
D	180mm Reel Paper Tape	15000
J	330mm Reel Paper Tape	50000
B	Bulk(Bag)	1000

Refer to pages from p.100 to p.103 for mounting information.

Rated Value (□: packaging code)

Part Number	Impedance (at 100MHz/20°C)	Rated Current	DC Resistance	Operating Temperature Range	
BLM03PG220SN1□	22ohm ±25%	900mA	0.065ohm max.	-55°C to +125°C	Kit
BLM03PG330SN1□	33ohm ±25%	750mA	0.090ohm max.	-55°C to +125°C	Kit

BLM03PX Series 0201/0603 (inch/mm)

Improved DC resistance meets larger current.

Dimensions

Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

Packaging

Code	Packaging	Minimum Quantity
D	180mm Reel Paper Tape	15000
J	330mm Reel Paper Tape	50000
B	Bulk(Bag)	1000

Refer to pages from p.100 to p.103 for mounting information.

Rated Value (□: packaging code)

Part Number	Impedance (at 100MHz/20°C)	Rated Current	DC Resistance	Operating Temperature Range	
BLM03PX220SN1□	22ohm ±25%	1800mA	0.040ohm max.	-55°C to +125°C	Kit ≥1A
BLM03PX330SN1□	33ohm ±25%	1500mA	0.055ohm max.	-55°C to +125°C	Kit ≥1A
BLM03PX800SN1□	80ohm ±25%	1000mA	0.130ohm max.	-55°C to +125°C	Kit ≥1A

Number of Circuits: 1

Impedance-Frequency Characteristics

Notice (Rating)

In operating temperature exceeding +85°C derating of current is necessary for BLM03PX_SN1 series.

Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

BLM18K

Series 0603/1608 (inch/mm)

6A max., high performance type for power lines up to 600ohm.

*Please refer to the products designed for both power lines and signal lines.

Dimensions

Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

Packaging

Code	Packaging	Minimum Quantity
D	180mm Reel Paper Tape	4000
J	330mm Reel Paper Tape	10000
B	Bulk(Bag)	1000

Refer to pages from p.100 to p.103 for mounting information.

Rated Value (□: packaging code)

Part Number	Impedance (at 100MHz/20°C)	Rated Current	DC Resistance	Operating Temperature Range	Kit	≥3A
BLM18KG260TN1□	260ohm ±25%	6000mA	0.007ohm max.	-55°C to +125°C	Kit	≥3A

BLM21AG471SN1

BLM21AG601SN1

BLM21AG102SN1

0805/2012 (inch/mm)
Chip Ferrite Bead

Chip EMIFIL®

Block Type EMIFIL®

Microwave Absorber

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

BLM21B

Series 0805/2012 (inch/mm)

0805 size for high speed signal lines.

Dimensions

Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

Packaging

• All except for BLM21BD222SN1/21BD272SN1

Code	Packaging	Minimum Quantity
D	180mm Reel Paper Tape	4000
J	330mm Reel Paper Tape	10000
B	Bulk(Bag)	1000

• BLM21BD222SN1/21BD272SN1 only

Code	Packaging	Minimum Quantity
L	180mm Reel Plastic Tape	3000
K	330mm Reel Plastic Tape	10000
B	Bulk(Bag)	1000

Refer to pages from p.100 to p.103 for mounting information.

Rated Value (□: packaging code)

Part Number	Impedance (at 100MHz/20°C)	Rated Current	DC Resistance	Operating Temperature Range	
BLM21BD121SN1□	120ohm ±25%	200mA	0.25ohm max.	-55°C to +125°C	Kit

Impedance-Frequency Characteristics

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

● Rating

1. About the Rated Current

Do not use products beyond the rated current as this may create excessive heat and deteriorate the insulation resistance.

2. About the Excessive Surge Current

Excessive surge current (pulse current or rush current) than specified rated current applied to the product may cause a critical failure, such as an open circuit, burnout caused by excessive temperature rise. Please contact us in advance in case of applying the surge current.

● Soldering and Mounting

• Self-heating

Please pay special attention when mounting chip ferrite beads BLM_AX/P/K/S series bead inductor BLE series in close proximity to other products that radiate heat.

The heat generated by other products may deteriorate the insulation resistance and cause excessive heat in this component.

Notice

● Storage and Operating Conditions

<Operating Environment>

Do not use products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

Do not use products in the environment close to the organic solvent.

<Storage and Handling Requirements>

1. Storage Period

BLM15E/15H/15G series should be used within 12 months, the other series should be used within 6 months.

Solderability should be checked if this period is exceeded.

2. Storage Conditions

(1) Storage temperature: -10 to +40°C

Relative humidity: 15 to 85%

Avoid sudden changes in temperature and humidity.

(2) Do not store products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

● Handling

1. Resin Coating

Using resin for coating/molding products may affect the products performance.

So please pay careful attention in selecting resin.

Prior to use, please make the reliability evaluation with the product mounted in your application set.

2. Handling of a Substrate

After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.

Excessive mechanical stress may cause cracking in the Product.

Bending

Twisting

● Notice (Soldering and Mounting)

1. Cleaning

Failure and degradation of a product are caused by the cleaning method. When you clean in conditions that are not in mounting information, please contact Murata engineering.

2. Soldering

Reliability decreases with improper soldering methods. Please solder by the standard soldering conditions shown in mounting information.

3. Other

Noise suppression levels resulting from Murata's EMI suppression filters EMIFIL® may vary, depending on the circuits and ICs used, type of noise, mounting pattern, mounting location, and other operating conditions. Be sure to check and confirm in advance the noise suppression effect of each filter, in actual circuits, etc. before applying the filter in a commercial-purpose equipment design.

⚠Note • Please read rating and ⚠CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

⚠ Note • Please read rating and CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
 • This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

● PCB Warping

PCB should be designed so that products are not subjected to the mechanical stress caused by warping the board.

Products should be located in the sideways direction (Length: $a < b$) to the mechanical stress.

2. Solder Paste Printing and Adhesive Application

When reflow soldering the chip ferrite beads and bead inductor the printing must be conducted in accordance with the following cream solder printing conditions.

If too much solder is applied, the chip will be prone to damage by mechanical and thermal stress from the PCB and may crack.

Standard land dimensions should be used for resist and copper foil patterns.

When flow soldering the chip ferrite beads and bead inductor apply the adhesive in accordance with the following conditions.

If too much adhesive is applied, then it may overflow into the land or termination areas and yield poor solderability. In contrast, if insufficient adhesive is applied, or if the adhesive is not sufficiently hardened, then the chip may become detached during flow soldering process.

(in mm)

Series	Solder Paste Printing	Adhesive Application
BLM BLE	<ul style="list-style-type: none"> Ensure that solder is applied smoothly to a minimum height of 0.2mm to 0.3mm at the end surface of the part. ⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

3. Standard Soldering Conditions

(1) Soldering Methods

Use flow and reflow soldering methods only.

Use standard soldering conditions when soldering chip ferrite beads and bead inductor.

In cases where several different parts are soldered, each having different soldering conditions, use those conditions requiring the least heat and minimum time.

Solder: Use Sn-3.0Ag-0.5Cu solder. Use of Sn-Zn based solder will deteriorate performance of products.

If using BLA series with Sn-Zn based solder, please contact Murata in advance.

Flux:

- Use Rosin-based flux.

In case of using RA type solder, products should be cleaned completely with no residual flux.

- Do not use strong acidic flux (with chlorine content exceeding 0.20wt%)

- Do not use water-soluble flux.

For additional mounting methods, please contact Murata.

(2) Soldering Profile

- Flow Soldering Profile
(Sn-3.0Ag-0.5Cu Solder)

Series	Pre-heating		Standard Profile			Limit Profile		
			Heating		Cycle of Flow	Heating		Cycle of Flow
	Temp. (T1)	Time. (t1)	Temp. (T2)	Time. (t2)		Temp. (T3)	Time. (t2)	
BLM (Except for BLM02/03/15/18G) BLE BLA31	150°C	60s min.	250°C	4 to 6s	2 times max.	265±3°C	5s max.	2 times max.

- Reflow Soldering Profile
(Sn-3.0Ag-0.5Cu Solder)

Series	Standard Profile				Limit Profile			
	Heating		Peak Temperature (T2)	Cycle of Reflow	Heating		Peak Temperature (T4)	Cycle of Reflow
	Temp. (T1)	Time. (t1)			Temp. (T3)	Time. (t2)		
BLM BLE BLA	220°C min.	30 to 60s	245±3°C	2 times max.	230°C min.	60s max.	260°C/10s	2 times max.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

(3) Reworking with Solder Iron

The following conditions must be strictly followed when using a soldering iron.(Except for BLM02 Series)

Pre-heating: 150°C 60s min.

Soldering iron power output / Tip diameter:

80W max. / ø3mm max.

Temperature of soldering iron tip / Soldering time / Times:

350°C max. / 3-4s / 2 times

Do not allow the tip of the soldering iron to directly contact the chip.

For additional methods of reworking with a soldering iron, please contact Murata engineering.

4. Cleaning

Following conditions should be observed when cleaning chip ferrite beads.

(1) Cleaning Temperature: 60°C max. (40°C max. for alcohol type cleaner)

(2) Ultrasonic

Output: 20W/liter max.

Duration: 5 minutes max.

Frequency: 28 to 40kHz

(3) Cleaning Agent

The following list of cleaning agents have been tested on the individual components. Evaluation of final assembly should be completed prior to production.

(a) Alcohol cleaning agent

Isopropyl alcohol (IPA)

(b) Aqueous cleaning agent

Pine Alpha ST-100S

(4) Ensure that flux residue is completely removed.

Component should be thoroughly dried after aqueous agent has been removed with deionized water.

(5) BLM_G type is processed with resin. On rinsing the product, using water for ultrasonic cleaning may affect the resin quality used for the product by water element. In case of set cleaning conditions, please make sure the reliability according to the cleaning conditions.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Microwave Absorber

Example of 3-Terminal Capacitor Structure

Chip 3-terminal capacitor is a chip-shaped 3-terminal capacitor designed for noise suppression. Its inner structure, like a feed-through capacitor, makes its ground impedance quite low. Owing to this structure, the 3-terminal capacitor has a good noise suppression effect at a high frequency range up to several hundred MHz.

Series	Equivalent Circuit	Part Number
NFM Series (3-terminal capacitor)		 NFM18CC NFM21CC NFM18PC NFM18PS NFM21PC
NFL / NFW Series (LC filter)		 NFL15ST NFL18ST NFL18SP NFL21SP NFW31SP
NFR Series (RC filter)		 NFA21SL NFA18SL NFA18SD
NFE Series (Feed through capacitor with ferrite cores)		 NFR21GD NFA31GD NFE31PT NFE61PT

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Insertion Loss Sample	Features	Classification		Applications	Example
	Standard of 3-terminal capacitor	NFM_CC	Standard type with varied capacitance	Noise suppression in low speed signal lines	<ul style="list-style-type: none"> Low speed interface lines Sensor
		NFM_PC	Meet large current, high capacitance available, for power lines	Noise suppression in power lines	<ul style="list-style-type: none"> Individual IC power lines
	Sharp insertion loss curve enables low damage to signal waveform	NFL_ST	T-type filter, effective in low impedance circuits	Noise suppression in high speed signal lines	<ul style="list-style-type: none"> High speed interface lines Bus lines LCD lines Camera I/Fs High speed analog lines RGB / D terminal
		NFL_SP	π-type filter, effective in high impedance circuits		
		NFW_SP	π-type filter, designed for low impedance circuits		
		NFA_SL	4-line array, suitable for bus lines or flat cables		
	Limit noise using resistor, also loop back to ground			Noise suppression in signal line with unstable ground	<ul style="list-style-type: none"> Interface lines Clock lines
	Meets large current, good high frequency performance because of its feed through structure			Noise suppression in power lines / low impedance lines	<ul style="list-style-type: none"> Various power lines Sensor

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

① Product ID

Product ID	
NF	Chip EMIFIL®

② Structure

Code	Structure
M	Capacitor Type
A	Capacitor Array Type

③ Dimensions (L×W)

Code	Dimensions (L×W)	EIA
15	1.0×0.5mm	0402
18	1.6×0.8mm	0603
21	2.0×1.25mm	0805
3D	3.2×1.25mm	1205
31	3.2×1.6mm	1206
41	4.5×1.6mm	1806

④ Features

Code	Features
CC	Capacitor Type for Signal Lines
PC	Capacitor Type for Large Current
PS	High Insertion Loss Type for Large Current
KC	Capacitor Type for Very Large Current

⑤ Capacitance

Expressed by three figures. The unit is in pico-farad (pF). The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures.

⑥ Packaging

Code	Packaging	Series
L	Embossed Taping (ø180mm Reel)	NFM3D/NFM31/NFM41
B	Bulk	All series
D	Paper Taping (ø180mm Reel)	NFM15/NFM18/NFM21/NFA□□CC

⑦ Characteristics

Code	Capacitance Temperature Characteristics
B	±10%, ±12.5%, +10/-13%
C	±22%
D	+22/-33%
F	+30/-80%, +30/-84%
R	±15%, +15/-18%
U	-750 ±120ppm/°C
S	+350 to -1000ppm/°C

⑧ Rated Voltage

Code	Rated Voltage
0E	2.5V
0G	4V
0J	6.3V
1A	10V
1C	16V

⑤ Capacitance

Expressed by three figures. The unit is in pico-farad (pF). The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures.

⑥ Resistance

Expressed by three-digit alphanumerics. The unit is in ohm (Ω). The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures. If there is a decimal point, it is expressed by the capital letter "R." In this case, all figures are significant digits.

- High frequency performance of NFM18PS series

Chip 3-terminal capacitor

2 terminal MLCC: 2012mm size
(0.1 μ Fx10pcs parallel)

NFM18PC105R0J3 1pc
: 1608mm size (1.0 μ Fx1)

NFM18PS105R0J3 1pc
: 1608mm size (1.0 μ Fx1)

NFM18PS series has better high-frequency performance compared to normal chip 3 terminal capacitors.

- Optimize of bypass capacitors using chip 3-terminal capacitor

Comparison of performance as a bypass capacitor

Noise suppression effect of NFM series is better than MLCCs (1 NFM is better than 4 MLCCs).

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

NFM3DPC223R1H3□	0.022μF ±20%	2A	50Vdc	1000M ohm	-55°C to +125°C	≥1A

Number of Circuit: 1

■ Insertion Loss Characteristics

■ Notice (Rating)

When NFM3DPC series is used in operating temperature exceeding +85°C, derating of current is necessary.

Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

NFM31PC

Series 1206/3216 (inch/mm)

6A/27microF, 1206 size chip 3-terminal capacitor for power lines.

*Please refer to the products designed for both power lines and signal lines.

Example of EMI Suppression in an Actual Circuit

Measuring Circuit

Type of Filter

Signal Wave Form (20ns/div) / EMI Suppression Effect / Description

Signal Waveform and Noise Spectrum before Filter Mounting

Signal Waveform (20ns/div)
1V/div)

Noise Spectrum
(10:1 Active Probe)

NFW31SP Series
(Cut-off frequency 50MHz)

Conventional Chip Solid Type EMI Filter
(NFM41CC 470pF)

Filter Combined with Conventional LCs

L: Chip Inductor
C: Chip Capacitor (270pF)

3-terminal capacitors suppress signal frequencies as EMI frequencies so the signal waveform is distorted.

Combinations of inductors and capacitors can yield a steep attenuation characteristic, but they require a great deal more mounting space. Moreover, at high frequencies the EMI suppression is less than that obtained by NFW31S.

¹Note • Please read rating and ²CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

NFR21GD Series 0805/2012 (inch/mm)

3-terminal RC filter, dampens the noise current and returns back to ground.

Insertion Loss Characteristics

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

⚠Caution

● Rating

Do not use products beyond the rated current and rated voltage as this may create excessive heat and deteriorate the insulation resistance.

● Soldering and Mounting

1. Self-heating

Please provide special attention when mounting chip EMIFIL® NFM□□P/K series in close proximity to other products that radiate heat.

The heat generated by other products may deteriorate the insulation resistance and cause excessive heat in this component.

2. NFL15ST_X Series Mounting Direction

Mount products in right direction, because products have a direction. Wrong direction which is 180° rotated from right direction cause fuming or partial dispersion, because input or output signal terminals short-circuit to ground.

○ Correct Connection

✗ Wrong Connection

Notice

● Storage and Operating Conditions

<Operating Environment>

Do not use products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

Do not use products in the environment close to the organic solvent.

<Storage and Handling Requirements>

1. Storage Period

Should be used within 12 months.

Solderability should be checked if this period is exceeded.

2. Storage Conditions

(1) Storage temperature: -10 to +40°C

Relative humidity: 15 to 85%

Avoid sudden changes in temperature and humidity.

(2) Do not store products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

● Notice (Soldering and Mounting)

1. Cleaning

Failure and degradation of a product are caused by the cleaning method. When you clean in conditions that are not in mounting information, please contact Murata engineering.

2. Soldering

Reliability decreases with improper soldering methods. Please solder by the standard soldering conditions shown in mounting information.

3. Points of Attention about NFM Pattern Forms

The loaded stresses are different to a chip depend on PCB materials and structures.

When the chip will be mounted on the metal PCB contained alumina material, PCB heat expansion/contraction will be a cause of chip cracks because the coefficients of thermal expressions are different between metal PCB and the chip itself.

In case of mounting 0402 or smaller size of NFM on single-layered glass epoxy board, chip cracks will be also occurred because of the same reason.

4. Component Mounting: 0402 size or smaller of NFM

If low bottom dead point of the pick-up nozzle is too low, chip cracks will be occurred because an extra power will be added to the chip during mounting. Therefore, the bottom dead point of pick-up nozzle must be set on/over the upper surface of the PCB. Adjusting is required when the bottom dead point will be set by correcting board warp. It is recommended that using the larger pick-up nozzle than chip length for avoiding what force impact will be centered to the middle point of components. Before assembling, please confirm its mounting accuracy under the best condition.

5. Other

Noise suppression levels resulting from Murata's EMI suppression filters EMIFIL® may vary, depending on the circuits and ICs used, type of noise, mounting pattern, mounting location, and other operating conditions. Be sure to check and confirm in advance the noise suppression effect of each filter, in actual circuits, etc. before applying the filter in a commercial-purpose equipment design.

Continued on the following page.

⚠Note • Please read rating and ⚠CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

● Handling

1. Resin Coating

Using resin for coating/molding products may affect the products performance.
So please pay careful attention in selecting resin.
Prior to use, please make the reliability evaluation with the product mounted in your application set.

2. Caution for Use (NFW Series)

When you hold products with a tweezer, please hold by the sides. Sharp materials, such as a pair of tweezers or other material such as bristles of cleaning brush, should not touch the winding portion of this product to prevent breaking the wire. Mechanical shock should not be applied to the products mounted on the board to prevent breaking the core.

3. Handling of a Substrate

After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.

Excessive mechanical stress may cause cracking in the Product.

Bending

Twisting

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

1. Standard Land Pattern Dimensions

NF□ series suppress noise by conducting the high-frequency noise element to ground. Therefore, to obtain maximum performance from these filters, the ground pattern should be made as large as possible during the PCB design stage. As shown below, one side of the PCB is used for chip mounting, and the other is used for grounding.

Small diameter feedthrough holes are then used to connect the grounds on each side of the PCB. This reduces the high-frequency impedance of the grounding and maximizes the filter's performance.

(in mm)

Please contact us if using thinner land pad than 18μm.

Continued on the following page.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

- Reflow Soldering NFE31PT

Continued on the following page.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

 (in mm)

NFE61PT

● Reflow Soldering

● Flow Soldering

● PCB Warping

PCB should be designed so that products are not subjected to the mechanical stress caused by warping the board.

Products should be located in the sideways direction (Length: $a < b$) to the mechanical stress.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

2. Solder Paste Printing and Adhesive Application

When reflow soldering the chip EMI suppression filter, the printing must be conducted in accordance with the following cream solder printing conditions.

If too much solder is applied, the chip will be prone to damage by mechanical and thermal stress from the PCB and may crack.

Standard land dimensions should be used for resist and copper foil patterns.

When flow soldering the EMI suppression filter, apply the adhesive in accordance with the following conditions. If too much adhesive is applied, then it may overflow into the land or termination areas and yield poor solderability. In contrast, if insufficient adhesive is applied, or if the adhesive is not sufficiently hardened, then the chip may become detached during flow soldering process.

3. Standard Soldering Conditions

(1) Soldering Methods

Use flow and reflow soldering methods only.

Use standard soldering conditions when soldering chip EMI suppression filters.

In cases where several different parts are soldered, each having different soldering conditions, use those conditions requiring the least heat and minimum time.

Solder: Use Sn-3.0Ag-0.5Cu solder. Use of Sn-Zn based solder will deteriorate performance of products.

If using NFM series with Sn-Zn based solder, please contact Murata in advance.

(2) Soldering Profile

● Flow Soldering Profile (Sn-3.0Ag-0.5Cu Solder)

Series	Pre-heating		Standard Profile		Limit Profile			
			Heating	Cycle of Flow	Heating	Cycle of Flow		
	Temp. (T1)	Time. (t1)	Temp. (T2)	Time. (t2)	Temp. (T3)	Time. (t2)		
NFM3D/31/41	150°C	60s min.	250°C	4 to 6s	2 times max.	265±3°C	5s max.	2 times max.
NFE61PT	150°C	60s min.	250°C	4 to 6s	2 times max.	265±3°C	5s max.	2 times max.
NFW31SP	150°C	60s min.	250°C	4 to 6s	2 times max.	265±3°C	5s max.	1 time max.

● Reflow Soldering Profile (Sn-3.0Ag-0.5Cu Solder)

Series	Standard Profile				Limit Profile			
	Heating		Peak Temperature (T2)	Cycle of Reflow	Heating		Peak Temperature (T4)	Cycle of Reflow
	Temp. (T1)	Time. (t1)			Temp. (T3)	Time. (t2)		
NFM NFA31CC/31GD, NFR	220°C min.	30 to 60s	245±3°C	2 times max.	230°C min.	60s max.	260°C/10s	2 times max.
NFA18S/21S (Except for NFA31CC/31GD) NFE, NFL	220°C min.	30 to 60s	245±3°C	2 times max.	230°C min.	60s max.	260°C/10s	2 times max.
NFW31SP	220°C min.	30 to 60s	245±3°C	2 times max.	230°C min.	60s max.	260°C/10s	1 time max.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

(3) Reworking with Solder Iron

The following conditions must be strictly followed when using a soldering iron.

Pre-heating: 150°C 60s min.

Soldering iron power output / Tip diameter:

30W max. / ø3mm max.*¹

*¹ NFM15: 30W max. / ø2mm max.

Temperature of soldering iron tip / Soldering time / Times:

350°C max. / 3-4s / 2 times*²

*² NFM15: 340°C max. / 3-4s / 1 time

NFE31PT152Z1E9: 280°C max. / 10s max. / 2 times

Do not allow the tip of the soldering iron to directly contact the chip.

For additional methods of reworking with a soldering iron, please contact Murata engineering.

4. Cleaning

Following conditions should be observed when cleaning chip EMI filter.

(1) Cleaning Temperature: 60°C max. (40°C max. for alcohol type cleaner)

(2) Ultrasonic

Output: 20W/liter max.

Duration: 5 minutes max.

Frequency: 28 to 40kHz

(3) Cleaning Agent

The following list of cleaning agents have been tested on the individual components. Evaluation of final assembly should be completed prior to production.

(a) Alcohol cleaning agent

Isopropyl alcohol (IPA)

(b) Aqueous cleaning agent

Pine Alpha ST-100S

(4) Ensure that flux residue is completely removed.

Component should be thoroughly dried after aqueous agent has been removed with deionized water.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

DL Series Introduction

Chip Ferrite Bead

Chip EMIFIL®

Chip Common Mode Choke Coil

Block Type EMIFIL®

Microwave Absorber

Common Mode Current

Differential Mode Current

Magnetic flux caused by common mode current accumulates and works as an inductor.

Magnetic flux caused by differential mode current cancel each other and does not work as an inductor.

Category	Features, Classification	Structure	Part Number	Comments
High cut-off frequency High Coupling (For high speed differential signal lines)	Ultra high cut-off frequency for high speed differential signal lines	Film type	DLP0QSA DLP0NSA DLP11SA DLP11RB DLP11TB DLP2ADA	<ul style="list-style-type: none"> Low profile, small size, suitable for mobile equipment. Tight terminal pitch enables high density layout. Ultra high cut-off frequency and its matching to line impedance enables good transmission of high speed signal.
		Wound type	DLW21SN_HQ2 DLW21HN_HQ2	<ul style="list-style-type: none"> Ultra high self-resonance frequency enables high cut-off frequency. Its matching to line impedance enables good transmission of high speed signal.
	High cut-off frequency for high speed differential signal lines	Multilayer type	DLM11SN	<ul style="list-style-type: none"> Enables noise suppression for differential signal line without distortion in high-speed signal transmission.
		Film type	DLP0QSN DLP0NS DLP11SN DLP11RN DLP2AD	<ul style="list-style-type: none"> Low profile, small size, suitable for mobile equipment. Tight terminal pitch enables high density layout. High cut-off frequency enables good transmission of high speed signal.
		Wound type	DLW21SN_SQ2 DLW31S DLW21HN_SQ2	<ul style="list-style-type: none"> Ultra high self-resonance frequency enables high cut-off frequency. DLW21H is designed as low profile.
	For general differential signal lines	Film type	DLP31S DLP31D	<ul style="list-style-type: none"> Low profile, small size, suitable for mobile equipment. Tight terminal pitch enables high density layout.
	Large current High coupling (For power lines)	Wound type	DLW5AH DLW5BS DLW5AT DLW5BT	<ul style="list-style-type: none"> Large current (6A max.), suitable for input connector from an AC adaptor. DLW5AT/DLW5BT is designed as low profile.
Relative high differential mode impedance Low coupling (For audio lines)	Multilayer type	DLM11G	<ul style="list-style-type: none"> Modified differential mode impedance is higher than other common mode choke coils; this feature makes it possible to suppress both common mode and differential mode noise. Ideal to keep low distortion audio signal. 	
Large current Automotive Available (For power lines)				
Available up to 18A	Winding type Cased structure	PLT10HH		<ul style="list-style-type: none"> Large current, high reliability, suitable for motors in automobiles.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Skew Improvement Effect of Common Mode Choke Coil

Example of Skew Improvement by Common Mode Choke Coil
(Tested using pulse generator waveform)

Waveform is equivalent to 1000Mbps signal

Waveform with intentionally made skew (skew: 100ps)

Skew is improved by common mode choke coil

Mechanism of Skew Improvement

Waveform rises (or falls)

Current change generates magnetic flux on a ferrite core

Electromotive force is generated on another line

This electromotive force works to decrease the delay of the waveform

Noise Suppression of Common Mode Choke Coil in HDMI Line

Device under test / Transmitter : game machine

/ Receiver : projector

/ Cable : HDMI category 2 3m cable

Test resolution / 1080p Deep color 12bit (Data 1.11GHz) DVD play mode

Test Example of HDMI1.3 Waveform Transmission

~Using ESD protection device
LXES15AAA1-100 (0.05pF)~

Signal frequency : 1.11GHz (Deep color 12bit)

ESD protection device only

Film Type DLP11SN900HL2
(Cut-off frequency is lowest in the table below)

	Wound Type DLW21SN900HQ2	Film Type DLP11SA900HL2	Film Type Array DLP2ADN900HL4
Cut-off Frequency	Over 10GHz	Around 6GHz	Around 4GHz
Judge	Specification satisfied	Specification satisfied	Specification satisfied
Transition Time	Rise time: 83.4ps Fall time: 77.4ps	Rise time: 90.4ps Fall time: 85.5ps	Rise time: 100ps Fall time: 97.4ps

Each common mode choke coil can keep the waveform and satisfy the specification.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

31	3.2×1.6mm	1206
43	4.5×3.2mm	1812
5A	5.0×3.6mm	2014
5B	5.0×5.0mm	2020

④ Features (1)

Code	Type
S	Magnetically Shielded One Circuit Type
D	Magnetically Shielded Two Circuit Type
H	Open Magnetic One Circuit Type
G	Magnetically Shielded Audio Type
R/T	One Circuit Low Profile Type

⑤ Category

Code	Category
A	
B	
C	
H	
M	
N	
R	

Expressed by a letter.

⑥ Impedance

Typical impedance at 100MHz is expressed by three figures. The unit is in ohm (Ω). The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures.

⑦ Inductance (DLW43SH)

Expressed by three figures. The unit is micro-henry (μH). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two figures.

⑧ Circuit

Code	Circuit
S	
M	
H	
U	
T	
X	

Expressed by a letter.

⑨ Features (2)

Code	Features
D	
K	
P	
L	
Q	
Y	

Expressed by a letter.

⑩ Number of Signal Lines

Code	Number of Signal Lines
2	Two Lines
4	Four Lines

⑪ Packaging

Code	Packaging	Series
K	Embossed Taping ($\varnothing 330\text{mm}$ Reel)	DLW5AH/DLW5BS/DLW5BT
L	Embossed Taping ($\varnothing 180\text{mm}$ Reel)	All Series
B	Bulk	All Series
D	Paper Taping ($\varnothing 180\text{mm}$ Reel)	DLP0QS/DLM11G

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

① Product ID

Product ID	
PL	Common Mode Choke Coils

② Type

Code	Type
T	DC Type

③ Applications

Code	Applications
10H	for DC Line High-frequency Type

④ Features

Code	Features
H	for Automotive

⑤ Impedance

Expressed by three figures. The unit is ohm (Ω). The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures.

⑥ Rated Current

Expressed by three figures. The unit is ampere (A). The first and second figures are significant digits, and the third figure expresses the number of zeros that follow the two figures. A decimal point is expressed by the capital letter "R." In this case, all figures are significant digits.

⑦ Winding Mode

Code	Winding Mode
P	Aligned Winding Type

⑧ Lead Dimensions

Code	Lead Dimensions
N	No Lead Terminal (SMD)

⑨ Packaging

Code	Packaging	Series

■ Impedance-Frequency Characteristics

DLW5AH_SQ2/DLW5BS_SQ2 Series

DLW5BS_TQ2 Series

■ Notice (Rating)

In operating temperature exceeding +75°C, derating of current is necessary for DLW5BSM191SQ2.

Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

In operating temperature exceeding +65°C, derating of current is necessary for DLW5BS_TQ2 series. Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

Impedance-Frequency Characteristics

Notice (Rating)

In operating temperature exceeding +65°C, derating of current is necessary for PLT10H series.

Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

⚠ Note • Please read rating and CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

!Caution

● Rating

Do not use products beyond the rated current and rated voltage as this may create excessive heat and deteriorate the insulation resistance. Be sure to provide an appropriate fail-safe function on your product to prevent a second damage that may be caused by the abnormal function or the failure our product.

● Soldering and Mounting

1. Self-heating

Please provide special attention when mounting chip common mode choke coils DLW5 series in close proximity to other products that radiate heat.

The heat generated by other products may deteriorate the insulation resistance and cause excessive heat in this component.

2. Mounting Direction

Mount Chip Common Mode Choke Coils in right direction. Wrong direction, which is 90 degrees rotated from right direction, causes not only open or short circuit but also flames or other serious trouble.

Notice

● Storage and Operating Conditions

<Operating Environment>

Do not use products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

Do not use products in the environment close to the organic solvent.

<Storage and Handling Requirements>

1. Storage Period

DLM11G series should be used within 6 months, the other series should be used within 12 months.

Solderability should be checked if this period is exceeded.

2. Storage Conditions

(1) Storage temperature: -10 to +40°C

Relative humidity: 15 to 85%

Avoid sudden changes in temperature and humidity.

(2) Do not store products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

● Notice (Soldering and Mounting)

1. Cleaning

Failure and degradation of a product are caused by the cleaning method. When you clean in conditions that are not in mounting information, please contact Murata engineering.

2. Soldering

Reliability decreases with improper soldering methods. Please solder by the standard soldering conditions shown in mounting information.

3. Other

Noise suppression levels resulting from Murata's EMI suppression filters EMIFIL® may vary, depending on the circuits and ICs used, type of noise, mounting pattern, mounting location, and other operating conditions. Be sure to check and confirm in advance the noise suppression effect of each filter, in actual circuits, etc. before applying the filter in a commercial-purpose equipment design.

● Handling

1. Resin Coating (Except for DLW Series.)

Using resin for coating/molding products may affect the products performance.

So please pay careful attention in selecting resin.

Prior to use, please make the reliability evaluation with the product mounted in your application set.

2. Resin Coating (DLW Series)

The impedance value may change due to high cure-stress of resin to be used for coating/molding products. An open circuit issue may occur by mechanical stress caused by the resin, amount/cured shape of resin, or operating condition etc. Some resin contains some impurities or chloride possible to generate chlorine by hydrolysis under some operating condition may cause corrosion of wire of coil, leading to open circuit.

So, please pay your careful attention in selecting resin in case of coating/molding the products with the resin. Prior to use the coating resin, please make sure no reliability issue is observed by evaluating products mounted on your board.

3. Caution for Use (DLW Series)

When you hold products with a tweezer, please hold by the sides. Sharp materials, such as a pair of tweezers, should not touch the winding portion to prevent breaking the wire. Mechanical shock should not be applied to the products mounted on the board to prevent breaking the core.

4. Brushing

When you clean the neighborhood of products such as connector pins, bristles of cleaning brush shall not be touched to the winding portion of this product to prevent the breaking of wire.

5. Handling of a Substrate

After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate. Excessive mechanical stress may cause cracking in the Product.

Bending

Twisting

!Note • Please read rating and !CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Caution**Rating**

- Do not use products beyond the rated current and rated voltage as this may create excessive heat and deteriorate the insulation resistance.
- Be sure to provide an appropriate fail-safe function on your product to prevent a second damage that may be caused by the abnormal function or the failure our product.

Soldering and Mounting**1. Self-heating**

Please provide special attention when mounting chip common mode choke coils in close proximity to other products that radiate heat.

The heat generated by other products may deteriorate the insulation resistance and cause excessive heat in this component.

2. Mounting Direction

Mount Chip Common Mode Choke Coils in right direction. Wrong direction, which is 90 degrees rotated from right direction, causes not only open or short circuit but also flames or other serious trouble.

**Notice****Storage and Operating Conditions**

DLW31SN	1.6	3.7	0.4	1.6
DLW43SH110/220/510	3.0	5.9	1.6	3.4
DLW43SH101	3.2	5.9	1.6	3.4

*1: If the pattern is made with wider than 1.2mm (DLW21) / 1.6mm (DLW31S) it may result in components turning around, because melting speed is different. In the worst case, short circuit between lines may occur.

*2: If the pattern is made with less than specified dimensions, in the worst case, short circuit between lines may occur due to spread of soldering paste or mount placing accuracy.

*3: If the pattern is made with wider than 0.8mm (DLW21) / 1.6mm (DLW31SN), the bending strength will be reduced. Do not use gild pattern; excess soldering heat may dissolve metal of a copper wire.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

 (in mm)

● PCB Warping

PCB should be designed so that products are not subjected to the mechanical stress caused by warping the board.

Products should be located in the sideways direction (Length: $a < b$) to the mechanical stress.

 Note • Please read rating and  CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

2. Solder Paste Printing and Adhesive Application

When reflow soldering the chip common mode choke coils, the printing must be conducted in accordance with the following cream solder printing conditions.

If too much solder is applied, the chip will be prone to damage by mechanical and thermal stress from the PCB and may crack.

Standard land dimensions should be used for resist and copper foil patterns.

When flow soldering the chip common mode choke coils, apply the adhesive in accordance with the following conditions.

If too much adhesive is applied, then it may overflow into the land or termination areas and yield poor solderability. In contrast, if insufficient adhesive is applied, or if the adhesive is not sufficiently hardened, then the chip may become detached during flow soldering process.

3. Standard Soldering Conditions

(1) Soldering Methods

Use flow and reflow soldering methods only.

Use standard soldering conditions when soldering chip common mode choke coils.

In cases where several different parts are soldered, each having different soldering conditions, use those conditions requiring the least heat and minimum time.

Solder: Use Sn-3.0Ag-0.5Cu solder. Use of Sn-Zn based solder will deteriorate performance of products.

If using DLP/DLM series with Sn-Zn based solder, please contact Murata in advance.

Flux:

- Use Rosin-based flux.

In case of DLW21/31 series, use Rosin-based flux with converting chlorine content of 0.06 to 0.1wt%.

In case of using RA type solder, products should be cleaned completely with no residual flux.

- Do not use strong acidic flux (with chlorine content exceeding 0.20wt%)

- Do not use water-soluble flux.

For additional mounting methods, please contact Murata.

(2) Soldering Profile

● Flow Soldering Profile (Sn-3.0Ag-0.5Cu Solder)

Series	Pre-heating		Standard Profile		Limit Profile		Cycle of Flow
			Temp. (T2)	Time. (t2)	Temp. (T3)	Time. (t2)	
	Temp. (T1)	Time. (t1)	Temp. (T2)	Time. (t2)	Temp. (T3)	Time. (t2)	
DLW5AT_MQ2 DLP31D/31S	150°C	60s min.	250°C	4 to 6s	265±3°C	5s max.	2 times max.

● Reflow Soldering Profile (Sn-3.0Ag-0.5Cu Solder)

Series	Standard Profile				Limit Profile			
	Heating		Peak Temperature (T2)	Cycle of Reflow	Heating		Peak Temperature (T4)	Cycle of Reflow
	Temp. (T1)	Time. (t1)			Temp. (T3)	Time. (t2)

DLW5A/5B	220°C min.	30 to 60s	250±3°C	2 times max.	230°C min.	60s max.	260°C/10s	2 times max.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

(3) Reworking with Solder Iron

The following conditions must be strictly followed when using a soldering iron.

Pre-heating: 150°C 60s min.

Soldering iron power output / Tip diameter:

30W max. / ø3mm max.

Temperature of soldering iron tip / Soldering time / Times:

350°C max. / 3-4s / 2 times^{*1}

*1 DLP0QS, DLP0NS, DLP11S, DLP11T, DLP1ND,

DLP2AD: 380°C max. / 3-4s / 2 times

DLW43S: 350°C max. / 3s / 2 times

Do not allow the tip of the soldering iron to directly contact the chip.

For additional methods of reworking with a soldering iron, please contact Murata engineering.

4. Cleaning

Following conditions should be observed when cleaning chip EMI filter.

(1) Cleaning Temperature: 60°C max. (40°C max. for alcohol type cleaner)

(2) Ultrasonic

Output: 20W/liter max.

Duration: 5 minutes max.

Frequency: 28 to 40kHz

(3) Cleaning agent

The following list of cleaning agents have been tested on the individual components. Evaluation of final assembly should be completed prior to production.

Do not clean DLW (Except for DLW21H) series.

Before cleaning, please contact Murata engineering.

(a) Alcohol cleaning agent

Isopropyl alcohol (IPA)

(b) Aqueous cleaning agent

Pine Alpha ST-100S

(4) Ensure that flux residue is completely removed.

Component should be thoroughly dried after aqueous agent has been removed with deionized water.

¹Note • Please read rating and CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Suppression of Ripple Noise of DC Side in the Switching Power Supply

Test Circuit

Type of Filter	EMI Suppression Effect / Description
Without Filter	 <p>+5.0V → 50μs/div 0.2V/div</p> <p>There is high frequency noise of 0.5V maximum.</p>
When BNX002-01 is used	 <p>+5.0V → 50μs/div 0.2V/div</p> <p>BNX002-01 can suppress most of the noise.</p>

Example of Impulse Noise Suppression

Type of Filter	EMI Suppression Effect
Without Filter	 <p>Impulse Noise 2000V/50ns</p> <p>Y-axis: 500V/div X-axis: 10ns/sec</p>
When BNX002 is used	 <p>Y-axis: 500V/div X-axis: 10ns/sec</p>

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

Operating Temperature Range: -40°C to +125°C

Insertion Loss Characteristics

Notice (Rating)

In operating temperature exceeding +85°C, derating of current is necessary for BNX01□ series. Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

● Connecting ± power line

In case of using ± power line, please connect to each terminal as shown.

Power Supply (BNX Input)	BNX	Circuit (BNX Output)
Power Supply +Bias	B CB	- Load Circuit +Bias
Power Supply Ground	PSG CG	- Load Circuit Ground
Power Supply -Bias	B CB	- Load Circuit -Bias
Power Supply Ground	PSG CG	- Load Circuit Ground

⚠ Note • Please read rating and CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

 Caution**● Rating**

Do not use products beyond the rated current and rated voltage as this may create excessive heat and deteriorate the insulation resistance.

Notice

● Storage and Operating Conditions

<Operating Environment>

Do not use products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

Do not use products in the environment close to the organic solvent.

<Storage and Handling Requirements>

1. Storage Period

BNX series should be used within 12 months.

Solderability should be checked if this period is exceeded.

2. Storage Conditions

(1) Storage temperature: -10 to +40°C

Relative humidity: 15 to 85%

Avoid sudden changes in temperature and humidity.

(2) Do not store products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

● Notice (Soldering and Mounting)

1. Cleaning

Do not clean BNX series (SMD Type).

Before cleaning, please contact Murata engineering.

2. Soldering

Reliability decreases with improper soldering methods.

Please solder by the standard soldering conditions shown in mounting information.

3. Other

Noise suppression levels resulting from Murata's EMI suppression filters EMIFIL® may vary, depending on the circuits and ICs used, type of noise, mounting pattern, mounting location, and other operating conditions. Be sure to check and confirm in advance the noise suppression effect of each filter, in actual circuits, etc. before applying the filter in a commercial-purpose equipment design.

● Handling

1. Resin Coating

Using resin for coating/molding products may affect the products performance.

So please pay careful attention in selecting resin.

Prior to use, please make the reliability evaluation with the product mounted in your application set.

2. Handling of a Substrate (for BNX02□)

After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.

Excessive mechanical stress may cause cracking in the Product.

Bending

Twisting

 Note • Please read rating and  CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

⚠Caution

● Rating

Do not use products beyond the rated current and rated voltage as this may create excessive heat and deteriorate the insulation resistance.

Notice

● Storage and Operating Conditions

<Operating Environment>

1. Do not use products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.
2. Do not use products near water, oil or organic solvents.

<Storage and Handling Requirements>

1. Storage Period
BNX Series should be used within 12 months.
Solderability should be checked if this period is exceeded.
2. Storage Conditions
 - (1) Storage temperature: -10 to +40°C
Relative humidity: 15 to 85%
Avoid sudden changes in temperature and humidity.
 - (2) Do not store products in a chemical atmosphere such as chlorine gas, acid or sulfide gas.

● Notice (Soldering and Mounting)

1. Cleaning

Failure and degradation of a product are caused by the cleaning method. When you clean in conditions that are not in mounting information, please contact Murata engineering.

2. Soldering

Reliability decreases with improper soldering methods. Please solder by the standard soldering conditions shown in mounting information.

3. Other

Noise suppression levels resulting from Murata's EMI suppression filters "EMIFIL" may vary, depending on the circuits and ICs used, type of noise, mounting pattern, lead wire length, mounting location, and other operating conditions. Be sure to check and confirm in advance the noise suppression effect of each filter, in actual circuits, etc. before applying the filter in a commercial-purpose equipment design.

● Notice (Appearance)

Although some part of the product surface seems to be white in some cases, do not care because it is the result of waxing process for humidity resistance improvement. This wax does not make bad affection to mechanical or electrical performance, reliability of the product.

⚠Note • Please read rating and ⚠CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

1. Standard Land Pattern Dimensions

BNX022
BNX023
BNX024
BNX025

■ Land Pattern + Solder Resist
 ■ Land Pattern
 ■ Solder Resist
 ○ Through Hole (in mm)

- (1) A double-sided print board (or multilayer board) as shown in the left figure is designed, and please apply a soldering Cu electrode with a product electrode to a "Land Pattern + Solder Resist" at Cu electrode.
- (2) This product is designed to meet large current. Please design PCB pattern which is connected to this product not to become too hot by applied large current.
- (3) Please drop CG on a ground electrode on the back layer (the same also in a multilayer case) by the through hole. And a surface to ground electrode layer may also take a large area as much as possible.
- (4) It is recommended to use a double-sided printed circuit board with BNX mounting on one side and the ground pattern on the other in order to maximize filtering performance, multiple feed through holes are required to maximize the BNX's connection to ground.
- (5) The ground pattern should be designed to be as large as possible to achieve maximum filtering performance.

● PCB Warping (for BNX02□)

PCB should be designed so that products are not subjected to the mechanical stress caused by warping the board.

Products should be located in the sideways direction (Length: a<b) to the mechanical stress.

2. Solder Paste Printing and Adhesive Application

When reflow soldering the block type EMIFIL®, the printing must be conducted in accordance with the following cream solder printing conditions.

If too much solder is applied, the chip will be prone to

damage by mechanical and thermal stress from the PCB and may crack.

Standard land dimensions should be used for resist and copper foil patterns.

Series	Solder Paste Printing	Adhesive Application																				
BNX022 BNX023 BNX024 BNX025	<ul style="list-style-type: none"> Guideline of solder paste thickness: 150-200μm <p>The diagram shows the solder paste printing guidelines for four BNX series. ⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

3. Standard Soldering Conditions

(1) Soldering Methods

Use reflow soldering methods only.

Use standard soldering conditions when soldering block type EMIFIL® SMD type.

In cases where several different parts are soldered, each having different soldering conditions, use those conditions requiring the least heat and minimum time.

Solder: Use Sn-3.0Ag-0.5Cu solder. Use of Sn-Zn based solder will deteriorate performance of products.

Flux:

- Use Rosin-based flux.

In case of using RA type solder, products should be cleaned completely with no residual flux.

- Do not use strong acidic flux (with chlorine content exceeding 0.20wt%)
- Do not use water-soluble flux.

For additional mounting methods, please contact Murata.

(2) Soldering Profile

● Reflow Soldering Profile (Sn-3.0Ag-0.5Cu solder)

Series	Standard Profile				Limit Profile			
	Heating		Peak Temperature (T2)	Cycle of Reflow	Heating		Peak Temperature (T4)	
	Temp. (T1)	Time. (t1)			Temp. (T3)	Time. (t2)		
BNX022/023/024/025	220°C min.	30 to 60s	250±3°C	2 times max.	230°C min.	60s max.	260°C/10s	2 times max.

(3) Reworking with Solder Iron

The following conditions must be strictly followed when using a soldering iron.

Pre-heating: 150°C 60s min.

Soldering iron power output: 100W max.

Temperature of soldering iron tip / Soldering time / Times:
450°C max. / 5s max. / 2 time

Do not allow the tip of the soldering iron to directly contact the chip.

For additional methods of reworking with a soldering iron, please contact Murata engineering.

4. Cleaning

Do not clean BNX022/023/024/025 series. In case of cleaning, please contact Murata engineering.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

1. Mounting Hole

Mounting holes should be designed as specified below.

BNX00□/01□	Component Side	Terminal Layout (Bottom figure)

2. Using the Block Type EMIFIL® (Lead Type) Effectively

(1) How to use effectively

This product effectively prevents undesired radiation and external noise from going out / entering the circuit by grounding the high frequency components which cause noise problems. Therefore, grounding conditions may affect the performance of the filter and attention should be paid to the following for effective use.

- (a) Design maximized grounding area in the P.C. board, and grounding pattern for all the grounding terminals of the product to be connected. (Please follow the specified recommendations.)
- (b) Minimize the distance between ground of the P.C. board and the ground plate of the product.
(Recommend using the through hole connection between grounding area both of component side and bottom side.)
- (c) Insert the terminals into the holes on P.C. board completely.
- (d) Don't connect PSG terminal with CG terminal directly.
(See the item 1. Terminal Layout)

(2) Self-heating

Though this product has a large rated current, localized self-heating may be caused depending on soldering conditions. To avoid this, attention should be paid to the following:

- (a) Use P.C. board with our recommendation on hole diameter / land pattern dimensions, mentioned in the right hand drawing, especially for 4 terminals which pass current.
- (b) Solder the terminals to the P.C. board with solder cover area at least 90%. Otherwise, excess self-heating at connection between terminals and P.C. board may lead to smoke and / or fire of the product even when operating at rated current.
- (c) After installing this product in your product, please make sure the self-heating is within the rated current recommended.

P. C. Board Patterns

Use a bilateral P.C. board. Insert the BNX into the P.C. board until the root of the terminal is secured, then solder.

(1) Component Side View

(2) Bottom View

Recommended Land Pattern

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

3. Soldering

- (1) Use Sn-3.0Ag-0.5Cu solder.
- (2) Use Rosin-based flux. Do not use strong acidic flux with halide content exceeding 0.2wt% (chlorine conversion value).
- (3) Products and the leads should not be subjected to any mechanical stress during the soldering process, or while subjected to the equivalent high temperatures.
- (4) Standard flow soldering profile

4. Cleaning

Clean the block Type EMIFIL®(Lead Type) in the following conditions.

- (1) Cleaning temperature should be limited to 60°C max.
(40°C max for alcohol type cleaner).
- (2) Ultrasonic cleaning should comply with the following conditions, avoiding the resonance phenomenon at the mounted products and P.C.B.
Power: 20W/liter max.
Frequency: 28 to 40kHz
Time: 5 min. max.
- (3) Cleaner
 - (a) Alcohol type cleaner
Isopropyl alcohol (IPA)
 - (b) Aqueous agent
Pine Alpha ST-100S

- (4) There should be no residual flux or residual cleaner left after cleaning.
In the case of using aqueous agent, products should be dried completely after rinsing with de-ionized water in order to remove the cleaner.
- (5) The surface of products may become dirty after cleaning, but there is no deterioration on mechanical, electrical characteristics and reliability.
- (6) Other cleaning: Please contact us.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

■ Minimum Quantity and Dimensions of 24mm Width Embossed Tape

Part Number	Dimensions			Minimum Qty. (pcs.)		
	a	b	c	ø180mm Reel	ø330mm Reel	Bulk
BNX022/023	12.4	9.4	3.5	400	1500	100

Part Number	Dimensions			Minimum Qty. (pcs.)

Notice

● Storage and Operating Conditions**1. Adhesive Tape Stress**

This product is designed to use adhesive tape to hold itself to the object.

And please avoid causing mechanical stress by bending or variation of the object.

**2. Cleaning**

Avoid cleaning this product.

3. Handling of the Product

Adhesive tape must be clean to maintain the quality of adhesion.

Please wipe off any dirt, dust and any kind of oil from the surface of the object before use.

4. Storage Conditions**(1) Storage period**

Products that were inspected by Murata over 6 months ago should be examined and used. This can be confirmed by the inspection No. marked on the container.

Adhesiveness should be checked if this period is exceeded.

(2) Storage conditions

- Products should be stored in the warehouse in the following conditions:

Temperature: -10 to +40°C

Humidity: 30 to 70% relative humidity

No rapid change of temperature or humidity

- Products should be stored in the warehouse without heat shock condition, vibration, direct sunlight and so on.

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Chip Common Mode Choke Coil Wire Wound Type	p197	Chip Ferrite Bead Array	p80
Chip Common Mode Choke Coil Wire Wound Type For Large Current	p177	Chip Ferrite Bead For GHz Band Noise	p85
Chip EMIFIL® Array	p80.83.139.145.148.153	Chip Ferrite Bead For High-GHz Band Noise	p91
Chip EMIFIL® Capacitor Type	p111	Common Mode Filter	p169
Chip EMIFIL® Capacitor Type Array	p139	EMIFIL®	p13.111.169.217
Chip EMIFIL® Feed Through Type	p121	EMI Suppression Filter	p13.111.169.217
Chip EMIFIL® For Large Current	p27.121.123.125.177.221	LC Combined L Circuit Array	p145
Chip EMIFIL® Inductor Type	p13	L Circuit Filter	p145
Chip EMIFIL® LC Combined Multilayer Type	p140	Microwave Absorber	p233
Chip EMIFIL® LC Combined T Circuit Type	p121.140	PI Circuit Filter	p143.144.150
Chip EMIFIL® LC Combined Type	p121	T Circuit Filter	p121.140

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

Introduction of Related Catalogs: Ferrite Core, Microwave Absorber/Lead Type EMIFIL®

Please refer to catalogs below for ferrite cores, Microwave Absorber and leaded EMIFIL®.

Ferrite Core, Microwave Absorber

Ferrite Core for EMI Suppression Microwave Absorber

Contents Thin Type Sandwich Core <FSSA>
Core for Flat Cables <FSRC>
Beads Core <FSRH>
Ring Core <FSRB>
Microwave Absorber <EA>

This Catalog is PDF version only. Please refer to following URL.
<http://www.murata.com/products/catalog/pdf/o63e.pdf>

Lead Type EMIFIL®

EMI Suppression Filters (Lead Type EMIFIL®)

Contents Ferrite Beads Inductors <BL01/02/03>
Disc Type EMIFIL® <DS□6/DS□9>
EMIGUARD®(EMIFIL® with Varistor Function)
<VF□3/VF□6/VF□9>
Common Mode Choke Coils <PLT>

⚠ Note • Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
• This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

EMICON-FUN!

Please check Murata's newsletter!
You can learn about electric parts with fun.
http://www.murata.com/products/emicon_fun/

EMICON-FUN! disseminated widely from basics (principles, characteristics, mounting, etc.) of capacitors, EMI suppression filters and inductors to information can practically be used.

Updated information is also distributed via the mail magazine.

the entrance of
register form

The screenshot shows the Murata Manufacturing website with the "EMICON-FUN!" section highlighted. The page features several sections: "Capacitor Room", "Noise suppression filter Room", "Inductor Room", and "For the EARTH". Each room has a list of articles. A central callout box for the "Murata Newsletter" is overlaid on the page, containing the text: "EMICON-FUN! issue available", "Click here to register", and "as reader". The "Murata" logo is at the top left, and a search bar is at the top right.

Small Magazine: Have fun while learning about electronic components

EMICON-FUN! Wide range of information about capacitors, noise suppression filters, and inductors.

Murata Newsletter

Capacitor Room

- Technical Report Evaluating Capacitors - Monolithic Ceramic Capacitors - Part 1 Trend (part 2/2)
- Technical Report Evaluating Capacitors - Monolithic Ceramic Capacitors Part 1 Trend (part 1 of 2)
- Monolithic Ceramic Capacitors GCO Series for Conductive Adhesive
- R21 series lead-type monolithic ceramic capacitors compatible to 100°C for automotive applications
- What kind of layout helps prevent chip monolithic ceramic capacitors from cracking?

Noise suppression filter Room

- Basis of Noise Countermeasures Lesson 12: How to Make the Best Use of LC Composite-type EMI filters
- Basis of Noise Countermeasures Lesson 11 Notes on the Use of Chip 2-Terminal Capacitors
- Basis of Noise Countermeasures Lesson 10: Precautions for Using Chip Ferrite Beads
- Why is differential transmission used for high-speed transmission?
- Both of the ILM_E series chip ferrite beads Entering unexplored ILM territory

Inductor Room

- Murata Develops World's Smallest Chip Inductors - 080604 size (0.21 x 0.125 mm)
- World's highest inductance values! Expanded lineup of ultra-compact X27T-40ch (0805mm) new high-Brightness chip inductors for smartphones - the LQWLTTH_32 series
- Announcement of inductor development [No. 7] Days worrying about high-frequency high-speed measurement technology
- Announcement about inductor development [No. 4] The new product inspired by a song!
- Announcement of inductor development [No. 7] Trends in LQH with increasing technology

For the EARTH

- Introducing Murata's school classes: What we can do for the children who will forge the earth's future
- Special Feature on the Environment, Part 3 "Toward a Low-carbon Society - Initiatives for Global Warming Prevention"

EMICON-FUN!
email Magazine: Have fun while learning about electronic components
The index of June 14 issue

- Inductor Room
- Product News
- Proposal of the Loss Reduction in the RF Circuit
- Industry Pickup - Smart Phones

Expertly written articles explain the basics of capacitors, inductors and EMI suppression filters.

Product News

- Large Current Common Mode Coil for Automotive Available <PLT10H series>
1. Meets large current up to 18A max. suitable for power lines.
2. Suitable for surface mounting.
3. Large common mode impedance up to 1000ohm [at 10mhz] enables good noise suppression effect.
4. Wide operating temperature range from -55°C to 125°C.

⚠ Note

1 Export Control

For customers outside Japan:

No Murata products should be used or sold, through any channels, for use in the design, development, production, utilization, maintenance or operation of, or otherwise contribution to (1) any weapons (Weapons of Mass Destruction [nuclear, chemical or biological weapons or missiles] or conventional weapons) or (2) goods or systems specially designed or intended for military end-use or utilization by military end-users.

For customers in Japan:

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

2 Please contact our sales representatives or product engineers before using the products in this catalog for the applications listed below, which require especially high reliability for the prevention of defects which might directly damage a third party's life, body or property, or when one of our products is intended for use in applications other than those specified in this catalog.

- ① Aircraft equipment
- ② Aerospace equipment
- ③ Undersea equipment
- ④ Power plant equipment
- ⑤ Medical equipment
- ⑥ Transportation equipment (vehicles, trains, ships, etc.)
- ⑦ Traffic signal equipment
- ⑧ Disaster prevention / crime prevention equipment
- ⑨ Data-processing equipment
- ⑩ Application of similar complexity and/or reliability requirements to the applications listed above

3 Product specifications in this catalog are as of March 2014. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product engineers.

4 Please read rating and ⚠ CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

5 This catalog has only typical specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.

6 Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or a third party's intellectual property rights and other related rights in consideration of your use of our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.

7 No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.
